& NOURISHING SYSTEM

HYDROFUSION

ADVANCED NON-INVASIVE CLEANSING & NOURISHING SYSTEM

Hydrofusion is an advanced, non-invasive facial cleansing and nourishing system developed by New Wave, combining a full range of popular solutions in one integrated platform. Designed to meet the growing demand for customised aesthetic treatments, Hydrofusion delivers effective cleansing, hydration, and skin rejuvenation without damaging the skin.

Powered by next-generation dual-power fluid vortex technology, Hydrofusion utilises vacuum negative pressure and a precision three-zone vortex probe. Working in synergy with natural botanical extracts, the system simultaneously "extracts" impurities and "infuses" active ingredients into the skin – achieving deep cleansing and nourishment in a single treatment.

CORE TECHNOLOGIES

Hydrofusion integrates five advanced technologies to deliver comprehensive skin care results:

- Dual-power fluid vortex technology
- Vibration superconductivity
- Sonic spatula exfoliation
- Hot & cold superconductivity
- Water-oxygen cleansing and high-pressure hydration

This multi-technology approach enables highly effective yet gentle treatments tailored to different skin conditions and client needs.

HYDROFUSION CLEANSING POWER

FIVE STEPS TO HEALTHIER, REVITALISED SKIN

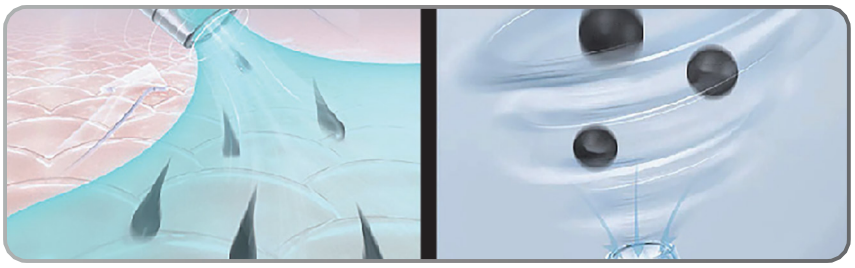

1. **Skin Rejuvenation & Moisturising**
   Enhances skin vitality and restores hydration
2. **Smooth & Comfortable Exfoliation**
   Gently removes dead skin cells and surface impurities
3. **Dual-Temperature Therapy**
   Alternating hot and cold therapy soothes skin and improves circulation
4. **Deep Cleansing & Revitalising**
   Effectively clears pores of oil, debris, and residue
5. **Hydrating & Rejuvenating**
   Promotes a brighter, smoother, and more youthful complexion

DUAL-POWER FLUID VORTEX TECHNOLOGY

The new-generation fluid vortex system precisely adapts to the skin from multiple angles. Through controlled vacuum pressure, it efficiently removes impurities from pores while simultaneously delivering botanical extracts deep into the skin – without irritation or damage.

This unique combination of "inhalation" and "conduction" ensures superior cleansing, hydration, and rejuvenation in a single, non-invasive treatment.

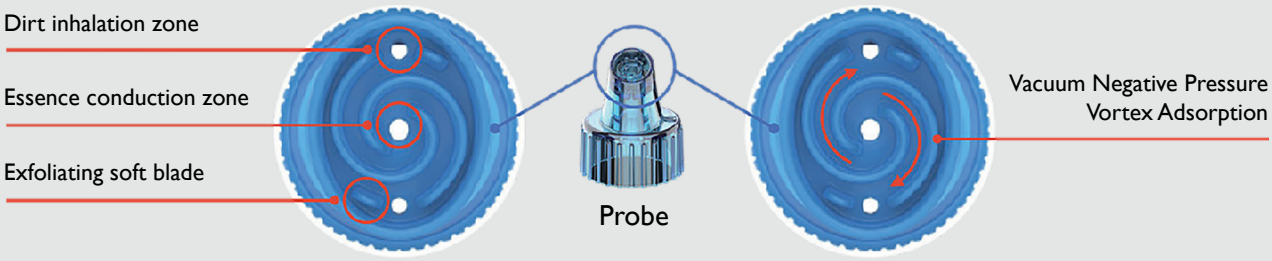

THREE-ZONE VORTEX PROBE DESIGN

The specialised probe features a three-zone structure:

- Exfoliating Soft Blade Zone – Gently removes dead skin cells
- Dirt Inhalation Zone – Extracts impurities and excess sebum
- Essence Conduction Zone – Delivers active serums into the skin

Its rounded, non-sharp design ensures close skin contact from all angles while maintaining maximum comfort and safety.

THE THREE-ZONE DESIGN

FIVE-STEP TREATMENT PROGRAM

RECOMMENDED: ONCE EVERY 4 WEEKS

1. EXFOLIATION & DEEP CLEANSING

Removes blackheads, pimples, oil, makeup residue, and impurities for refreshed, purified skin.

2. DEEP HYDRATION & MOISTURISATION

High-pressure, non-invasive hydration atomises serums into nano-molecules, delivering moisture into deeper skin layers.

3. SKIN REJUVENATION

Helps shrink pores, reduce fine lines, and brighten skin tone.

4. SOOTHING & SKIN IMPROVEMENT

Calms inflammation, reduces sensitivity, and restores skin comfort.

5. ENHANCED NUTRIENT ABSORPTION

Improves skin elasticity and maximizes absorption of active ingredients.

APPEARANCE & INDUSTRIAL DESIGN

CORE TECHNOLOGIES

Hydrofusion features a premium black-and-gold ultra-thin design, reflecting New Wave's commitment to innovation and quality.

Key design highlights include:

- 15-inch high-definition integrated touchscreen
- All-aluminum body and accessory tray
- Ergonomic handles and plug-and-play bottle system
- Reinforced glass panels for durability
- Large silent wheels for smooth, quiet operation
- Adjustable ambient lighting with 16.77 million color options

Every detail is engineered for durability, ease of use, and a refined clinical experience.

TECHNICAL SPECIFICATIONS

Device Size	40 x 42 x 111 cm
Weight	43.5 kg
Power	200 W
Screen	15-inch HD touch screen
Handles	6
Suction	4-5 kg
Ultrasonic Frequency	1.1 MHz
Vibration Frequency	28-30 KHz
Temperature Range	Hot: 36-46°C, Cold: 0-6°C

MANUFACTURER & SUPPORT

CE Certified. New Wave provides comprehensive support including:

Technical Support

Clinical Training Support

Marketing Materials Support

Warranty & Registration Support
